

YORK® multi-speed air handlers

JHE Single Piece Air Handler
JME Modular Air Handler

1.5-5 Ton

Streamlined design, efficient performance, exceptional reliability

YORK® air handlers have been completely redesigned, raising the bar on quality with a higher level of efficiency and operational performance. By changing our traditional coil design, we've ensured homeowners and contractors alike can quickly and easily improve the performance of their home comfort system.

Next-generation design optimizes performance and efficiency

- High-efficiency, nine-speed ECM blower motor
- A maximum 21in. depth, smooth sides and a rigid case construction make installation easier in tight spaces
- Enhanced and efficient coils designed for new low global warming potential (GWP) R-454B refrigerant
- Lock-in, single-piece insulation reduces air leaks

 **YORK®**

Proven construction

1. Rigid case construction and interior bracing provide solid structural support for all applications
2. Thermoset drain pan is corrosion- and UV-resistant with a positive slope for drainage
3. Case doesn't have any protruding screw heads, limiting scratches or other property damage during installation

Advanced comfort

4. New nine-speed blower motor allows for more application flexibility
5. Redesigned coils work efficiently with low GWP R-454B refrigerant
6. Factory-installed refrigerant detection system (RDS)
7. Achieves 2% or less total airflow leakage rate at duct leakage test conditions in positive and negative pressure for system airflow verification

Easier installation and servicing

8. Multiposition design for upflow, downflow and horizontal applications
9. 8HK assortment of plug-and-play electric heat kits for all heating needs
10. Compact, 21in. casing depth allows for ease of access in attics and applications where space is limited
11. Integrated duct flange is part of the casing for faster installation
12. Factory-installed TXV with nonbraze, bolt-on connectors makes installation easy
